

Two-Year Planning

Haley McElroy, Ethan Skaggs, Joseph Poirier

Project Details

- Our project will allow a future student to map out a two-year plan. The first step will be a student selecting which college at Athens State they wish to get class details about. The second step will be choosing a degree and semester to start. The third step will display the available courses for the selected degree and semester. Once classes for the first semester have been chosen, a student will be able to map out their entire plan.

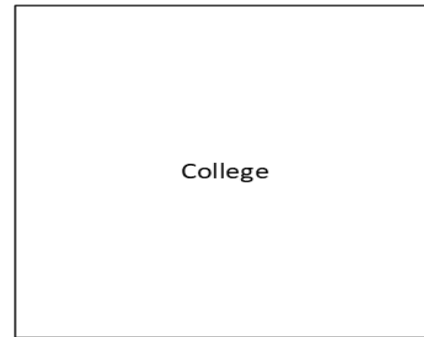

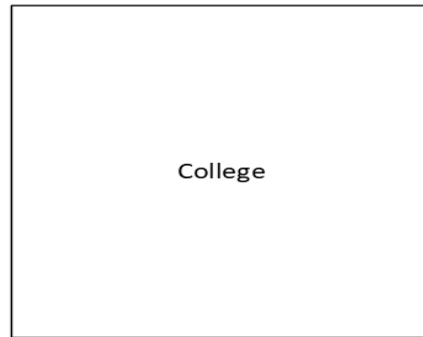

Tools

- Web Pages
 - HTML
- Database
 - MySQL
- Accessibility
 - WebAim

Plan

- First Sprint
 - Have wireframes completed
 - Time frame – one day
 - Have the html for each page completed
 - Time frame – three weeks
 - Start on the database
 - Start day – 1/23/25
